Re: Using the Traffic and Criminal Software (TraCS) interface with the new DataMaster DMT

The Department of Transportation, in conjunction with the Department of Public Safety, has approved the use of the Iowa Department of Transportation's TraCS program when interfaced with the DataMaster DMT.

An interface between TraCS and the DataMaster DMT has been created that is operated in virtually the same manner as the interface established between TraCS and the DataMaster cdm, the instrument currently in use.

Therefore, law enforcement personnel certified by the Department of Public Safety to perform breath testing on the DataMaster DMT previously trained on the TraCS interface with the DataMaster cdm, will be authorized to utilize the TraCS interface on the DataMaster DMT without any re-training necessary.
